Career

Themis (Principal Software Engineer)

2025 - Today

Built and hired the frontend engineering team, establishing a high-performance culture and raising the technical bar across the organization.

Led the successful rearchitecture of the web application, improving scalability, maintainability, and developer velocity.

Drove technical strategy and architecture decisions across major frontend initiatives.

Led the development and delivery of key product features.

Built a shared frontend component library to improve consistency, quality, and development speed.

Introduced AI-powered engineering workflows and tools that increased team productivity while maintaining high quality standards.

Established frontend engineering standards and best practices adopted across the company.

Worked closely with leadership to align technical decisions with product and business goals.

Arctic Wolf Networks (Staff Software Engineer)

2023 - 2025

Architected the monorepo with Nx.

Led feature development using React and Golang.

Improved coding standards across the company.

Mentored teams on best practices.

Unity Technologies (Staff Software Engineer)

2020 - 2023

Led the architecture rewrite of the Ads SDK webview, used daily by millions of users.

Led feature development for the Unity Dashboard.

Contributed to the architecture and improved development best practices.

Maintained the frontend component library.

LVL Studio (Senior software engineer)

2018 - 2020

Created a Storefront Manager in **React** with **TypeScript**. The tool allowed operators

to configure the visual treatment and content of audio and video applications.

Built a web framework with **TypeScript**.

Developed audio and video on-demand applications.

VINCI Construction (Senior software engineer)

2017 - 2018

Research and development for mixed reality glasses, **Microsoft HoloLens**.
Development of a mixed-reality application using **Unity** and **C#** that helped with construction site renovations by virtually highlighting areas.

Built an **Angular** and **Electron** application displayed on two giant touch screens.
The application served as a showcase for the various projects carried out by VINCI Construction and was presented at events and exhibitions.

Developed and maintained web and mobile applications (**Angular, Xamarin iOS, C#, ElasticSearch**) to monitor compliance with safety, environmental, and quality rules on construction sites.

Developed the VINCI Construction France business and organizational objectives management tool (**Angular, C#, Dapper**).

Development of a note-taking tool for construction workers to log issues (**Angular, C#, CQRS**).

Ardian (Software engineer)

2016 - 2017

Development of a financial management application.
Back-end programming in **C#** with **Entity Framework** and a **SQL** database.
Front-end with **AngularJS/TypeScript**.
Unit tests (**Fixtures, mock data, TDD**).
Coding while following development best practices.

AUSY (Software engineer)

2015 - 2016

Development and maintenance of **Java** projects.
Built a **Maven** project with **Sculptor Generator**.
Writing functional and unit tests with **Selenium, JBehave, JUnit (TDD, BDD)**.

Set up a **Red Hat Linux** continuous integration server.
Configured and installed various tools on the server (**Tomcat, Jenkins, SonarQube, OpenLDAP, Git, MySQL, Nexus, Maven**).
Configured **Jenkins**.
Documentation of technical specifications.

Development of a PDF management and auto-filling tool in **Java**, using **iText**.

Institute for Brain and Spinal Cord (Software engineer)

2014 - 2015

Intranet development with **SharePoint**.
Project management, evaluation of user needs, and leading training sessions.
Creation of sites and components, and management of permissions.
Writing technical documentation.

Education

Master's degree in Computer Science (UQAC)

Québec

2015 - 2016

Master's degree in Software Architecture (ESGI)

France

2014 - 2016

Bachelor's degree in Software Architecture (ESGI)

France

2011 - 2014
